

HEAT TOLERANCE! IT IS A CHALLENGE!

The slick gene is the genetic part of the answer.

JA-BOB MAMBO SL-RED backed by Rudolph Missy Family.
His dam is VG with 5-2 354d 38080m 4.6%f 1787 3.3%p 1259 inc.
Mambo is owned by ABC Genetics and A Legacy Genetics.

aAa 246 **COLGANADOS AVIATOR SL RC** is from
Seagull-Bay Miss America, full sister to Seagull-Bay Supersire.
Aviator is owned by Mark Yeazel and A Legacy Genetics.

Research at the University of Puerto Rico is showing an advantage of 1500 pounds of milk per year and breeding back 30 days quicker for dairy cattle that have the slick gene versus the normal longhaired gene. This is especially important for cattle that graze in the sun and live in tropical conditions. Breeding cattle specific to the environment is here with the slick gene introduction. At Ja-Bob Holsteins, we have red and polled slick donors that are from world famous cow families such as the Helen's, Scarlets, Roxy's, Verdejo and Rudolph Missy. We can make embryos for you! We can export semen to you on our two slick bulls:
